CORNELL UNIVERSITY
TENURE-TRACK PROFESSORIAL POSITION
THEORETICAL PARTICLE PHYSICS

The Department of Physics at Cornell University invites applications for a tenure-track Assistant Professor appointment in theoretical particle physics, to begin in Fall 2007 or later. Outstanding applications at a more senior level may be considered in exceptional cases. We are seeking highly qualified candidates committed to a career in research and teaching. We are encouraging applications from candidates with interests in any area of high-energy physics, including string theory, mathematical physics, particle cosmology, physics beyond the Standard model, and Standard Model physics.

Applicants should send their curriculum vitae, publication list, a brief description of their research interests, and arrange for three letters of reference to be sent to:

Prof. Andre LeClair
Search Committee Chair
Newman Laboratory for Elementary-Particle Physics
Cornell University
Ithaca, NY 14853

Applications received before January 15, 2007 will receive fullest consideration, although later applications may also be taken into account. Cornell University is an equal opportunity, affirmative action employer.
